

Chairman's Presentation for FRC team 6016

On January 17, 2018, MORT travelled to Hackettstown High School to give a presentation to FRC team 6016 Tiger Robotics. We stressed to 6016's members that FIRST is more than just Robots. We gave them pointers on the what, why, and "how to" of MORT Chairman's. This included discussing:

1. How our team structure is organized
2. How we accomplish and progress with our outreach efforts
3. Why Outreach Matters
4. Chairman's Award Tips
5. How we present to potential sponsors

We talked about these topics in extensive detail in order to give Tiger Robotics the best chance at creating a Chairman's Team within their team structure. MORT also had the opportunity to tour Tiger Robotics' workshop and learn more about how their program personally works. Tiger Robotics also took time out of their schedule to tour our workshop as well.

This event was quite impactful as MORT and Tiger Robotics now actively maintain a friendly and cooperative relationship. We are comfortable with relying on each other for help, resources, and any chance for working together on outreach efforts. We hope to work more with Tiger Robotics in the future!
