

Department of Education / STEM Education Coalition

MORT is one of the first robotics teams to join the STEM Education Coalition. Our participation in the Nation Advocacy Conference impacted our team on a very personal level, and was the catalyst that led us to become a part of this very important coalition.

MORT's future goal includes expanding and strengthening our existing relationship with the STEM Education Coalition. We are committed to our goal of advocating, impacting policy and being leaders in this very important mission.

The central mission of the STEM Education Coalition is to inform federal and state policymakers on the critical role that science, technology, engineering, and mathematics (STEM) education plays in U.S competitiveness and future economic prosperity.

- STEM Education must be elevated as a national priority
- Our nation's future economic prosperity is closely linked with student success in the STEM fields.
- The U.S must expand the capacity and diversity of the STEM workforce pipeline.
- PolicyMakers at every level must be informed about policy issues related to STEM education
- Effective policies to promote STEM education should be bipartisan and evidence-based
