

MORT Kick-Off Event

Kick Off is the most anticipated event that takes place before the competition season for all FRC teams. Each year MORT invites our sponsors, community, and other teams such as Roxbotix to join our team for this exciting day.

MORT Roll Out

Each year, MORT gives a presentation to the parents, local community members and our sponsors about how the team works and the team's accomplishments. MORT finishes the presentation with the unveiling of our final robot for that FRC season. The leaders of the team MORT 11 explain their goals and plans that they have accomplished during build season. After this, the students explain how the robot works, and how the robot will be used in that year's competition.
