

Video Conference with Team 4856

In the Summer of 2017, MORT held a video conference with Team 4856, Double X Robotics, located in Manhattan, New York. We used this time to discuss with Double X Robotics on:

1. How our team structure is organized
2. How to start a successful CAD team
3. Helpful CAD Resources
4. How we use our funding
5. How we present to potential sponsors

MORT talked about these topics in extensive detail in order to give Double X Robotics a suitable chance at working on their team funding, implementing a CAD team, and how to look “exciting” to potential sponsors. We also gave them our preferences on certain mechanisms they asked about, explaining our experience in the past with robots who had these mechanisms.

MORT is proud to say we impacted Double X Robotics profoundly as they used the resources and tips we gave them to change their team functionality to how they wanted it to be. We keep in contact with Double X Robotics in order to provide or receive any help in the future as well as communicating with them when we are in the area!
