

Wendy Williams Show

Our social media sub team was given the amazing privilege of visiting the set of the Wendy Williams Show and meeting and speaking to Wendy Williams herself. It was a fulfilling experience and gave students a better understanding of how important social media is amongst a team. Visiting the show also allowed these students to put into perspective the demand and importance social media has in the professional world. This was a great venue for MORT to share our program as a FIRST robotics team with media that has a national following.
